Sprinkler weekly test log

Template to print and fill in by hand · Works to BS EN 12845, without quoting it · Check the current edition

Kerova

How often

- **Weekly:** The site's own routine check, at the same time each week, following the checking routine the installer or servicing firm left for the system.
- **Each installation:** A site with more than one installation (valve set) fills in a line for each one.
- **Anything wrong:** Written down on the day, with who was told, and kept until it's put right.

Installation details

Site name

Site address

Responsible person

Installations (valve sets) and where they are

Water supply (mains, tank, pump)

Pump set (if any) and where it is

Servicing company and phone

Readings to expect (from the installer's schedule)

Weekly test

One line per installation each week. Write in the gauge readings as you find them and compare them with the readings to expect above. Follow the checking routine for your system.

Date and time	Installation / valve set	Pressures (gauge readings as found)	Water supply OK? (Y/N)	Alarm valve / motor gong test OK? (Y/N)	Pump started? (Y/N/none)	Notes, problems found	Name and signature

Date and time	Installation / valve set	Pressures (gauge readings as found)	Water supply OK? (Y/N)	Alarm valve / motor gong test OK? (Y/N)	Pump started? (Y/N/none)	Notes, problems found	Name and signature

Faults and actions

Date	Installation	Fault found	Who was told	Put right (date)

Service visits

Filled in by the servicing firm.

Date	Company and engineer	Visit	Defects found, and anything agreed	Report ref.
